

ANSELL Glove Hyflex 11-531

Description

The 11-531 optimizes the convergence of protection and performance. It features an 18G ultralight weight liner with INTERCEPT TECHNOLOGY® yarns that provides ANSI Level 2 performance. The liner also features ZONZ™ Comfort Fit Technology for breathability and ergonomic movement. The palm dipped coating and the FORTIX™ Technology formulation provide enhanced abrasion resistance and grip. To provide all four advanced performance technologies, including cut performance, in a comfortable, flexible ultralight weight style, is a game changer for applications where workers have traditionally guarded against cut risks with heavier styles that limit their dexterity and breathability.
